

Vipa Group ensures uninterrupted operations critical for managing the intricate logistics of its global supply chain by creating a highly available IT infrastructure around **StarWind Virtual SAN (VSAN)**

About the Company

Vipa Group is a global merchandiser of recovered paper, prime paper, stock lots, and other recyclable raw materials and recycling services.

Industry

Manufacturing

Location

EMEA (Switzerland)

Solution

StarWind Virtual SAN (VSAN)

"StarWind VSAN allowed for increasing the redundancy and resiliency of the company at a logical cost."

Christos Aivazoglou,
Senior Lead Infrastructure Engineer

Challenge

Before StarWind Virtual SAN (VSAN) deployment, Vipa Group operated on a standalone ESXi host, which lacked a high availability (HA). In the event of a hardware failure, the entire system was vulnerable to downtime, jeopardizing operations and productivity.

Despite exploring alternatives like Nutanix, StarWind stood out for its affordability and exceptional pre-sales support.

Solution

Vipa Group chose StarWind VSAN as it not only offered a cost-effective solution but also provided seamless integration and unparalleled customer service. By implementing StarWind VSAN, Vipa Group significantly improved business continuity without breaking the bank.

While the system satisfies most requirements, Vipa Group is planning to further enhance its infrastructure by upgrading to Fiber Channel with NVMe, ensuring even greater performance and reliability. With StarWind VSAN, Vipa Group continues to thrive in a competitive market, empowered by a robust and reliable IT infrastructure.
